

SALT

FESTIVAL 2021

16—25 APRIL

ANYTHING IS POSSIBLE

Events and Tickets at saltfestival.com.au

SALT is a festival of **ART, CREATIVITY, INNOVATION** and **CULTURE**

At SALT, Creativity and Conferences co-exist in what is the largest festival of its kind in the Southern Hemisphere all set against an exquisite backdrop - the Southern Eyre Peninsula.

SALT

FESTIVAL 2021

The **SALT Shaker hub space** is the place to visit during SALT to chill out, share coffee and connect with the exquisite range of events in our 2021 program.

While you're there, be sure to take a look at **FACING EYRE**, an exhibition curated by renowned local artist **EMMA FUSS** featuring twenty-five portraits of local sitters by twenty-five local artists. Stick around in the Shaker as the sun sets for **SONGWRITERS IN THE ROUND**. Be entertained and inspired as local musos share their own original music and the story behind it.

The program features a daily guide to **SALT Festival** as well as a list of exhibitions open throughout. We are proud to present **SALT STAGE**. Immerse yourself in the nostalgic sounds of SA based **TIMBERWOLF, JOSHY WILLO & THE KINGFISHERS, plus YOUNG SAWYER**. Or settle in for a magical, family friendly night as the sweet sounds of the **ADELAIDE SYMPHONY ORCHESTRA** float on the Southern Sea breeze for the first time in 67 years during **SYMPHONY BY THE SEA**. Celebrate and explore our seafood and fishing industry with **UPWELLING**, an immersive seafood showcase which will present innovation in our sustainable fishing and aquaculture sectors. For the curious, **NIGHT IN THE STARS** events return as Australia's leading ethno-astronomer Paul Curnow shows us the Night Sky and presents talks on the evolution of Whales to an audience nestled on the shore. If comedy is more your thing join the **COMEDY CRUISE** and set sail in Boston Bay for a stitch inducing night on the water. Plan your SALT Festival as you go with new events being added regularly.

Night of the Whale

Friday 23rd April // Time: 6:30pm

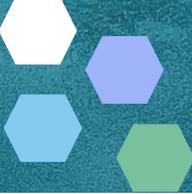

Cost: \$10 Adults - Children FREE

Location: To be announced (Open Air)

A magical evening under the stars, by the sea, featuring Paul 'Starman' Curnow with his new talk, 'The Evolution of Whales' and a parade of lanterns.

The evolution of whales was remarkably fast. And as someone who teaches astronomy, many fellow astronomers would be familiar with the constellation 'Cetus the Whale', which is the 4th largest constellation in the night sky. However, whales make their first appearance on the Earth some 50-million years ago. How is it that these former land dwelling mammals evolved back into the ocean after nearly 200-million years of living on the land? How have whales evolved and diversified over this time into over the 90 different species that we see today? In this talk, I will take you on a journey through the evolutionary history of whales, in addition to telling you about where they feature in palaeontology, mythology, and astronomy. You won't believe your eyes when the visitor from the deep arrives.
